

New York Upstate Chapter ASLA

Efforts Towards Environmental Excellence

Syracuse, New York

MORNING SESSIONS

Marcellus Shale | Melody Kight and Dr. Donald Siegel

The Appalachian Basin contains one of the largest natural-gas plays in the world. The gas-extraction industry has initiated hydrofracing to produce methane from the shale. The long-term history of gas production and the science behind it hydrofracking shows that public fears of hydrofracking are misplaced. Dr. Donald Siegel and Attorney Melody Kight will discuss the current scientific and legal issues associated with hydrofracing in New York. 1.5 CEU

Transfer of Development Rights Program: A winning Solution for Farmland Protection and Smart Growth Planning | Jim Laird Jr., RLA

This Presentation will provide an update on the TDR Program, an overview of the municipal law and the benefits from the municipality's and developer's perspectives. We will present the municipal process of transferring DR's, but also the Smart Growth Planning and Conservation Subdivision opportunities that the program offers. The community benefit is the long term preservation of quality farmland, an agrarian landscape and overall rural character and quality of life. 1 CEU

AFTERNOON SESSIONS

New York State Parks and Historic Sites System | Mike Geiss

This presentation is a history of the New York State Parks and Historic Sites System from 1850 to the present, which to a large extent also depicts the history of the recreation movement in the state as well as the country. 1 CEU

The Syracuse Connective Corridor | Jeffery B. Nadge, RLA, LEED AP

The City of Syracuse and Syracuse University have invested significant resources in creating a unique vision of a true pedestrian and transit corridor that would connect major portions of downtown Syracuse and University Hill while revitalizing the areas in between. Barton & Loguidice (B&L) has been retained to design this multi-modal, traffic-calming transportation "Connective Corridor" that will emphasize bicycle, pedestrian, and public transportation that connects Syracuse University and downtown Syracuse while bringing arts, culture, and the community together. (Includes walking tour) 1.5 CEU

Center of Excellence Building Tour | Tim Benson and Martin Walls

Participants in the Syracuse Center of Excellence headquarters tour will have the opportunity to walk through the building with SyracuseCoE staff and discover the uses of this "living laboratory," learn about the dozens of sustainability features designed to earn the building a LEED-Platinum rating, and view the latest SyracuseCoE research and demonstration projects on-site. 1 CEU

Genesee Grande Hotel Syracuse

1060 East Genesee Street | Syracuse, New York 13210
